CYCLE SAFE

For many years trucks have been required to have an extra, wide angle, mirror to aid and improve driver visibility yet buses, which can be the same size and operate in a stop-start urban environment, don't.

Why?

Growing concern about the number of accidents involving cyclists and pedestrians means that greater emphasis is being placed on finding a solution. The simplest, most effective, solution could be to fit a better style of mirror. The girl on her cycle, in the image below, is invisible to the driver yet if you turn the page over we'll show you how we can change this, in seconds, for the fraction of the cost of some other solutions.

INTERNATIONAL TRADE
2012

The image above shows the drivers view using one of the most popular mirrors on UK buses. The road cones show the outer limits of the drivers visibility. Some other mirrors used are even smaller than this, further restricting visibility.

When the Ashtree Cyclesafe twin lens mirror is fitted we have a completely different view. The invisible cyclist is now fully visible, as is the kerb and the door way.

The Ashtree Cyclesafe is universal. It will fit mirror arms of 16-28mm in diameter. Both lenses are independently adjustable and the clamp on the back of the mirror allows further adjustment. Unlike other twin lens mirrors, the sleek design of the body means that forward visibility will not be affected any more than it would be by a standard mirror.

Details of different models are shown on the grid below.

Part number	Dimensions	Comments
		<i>Non powered versions</i>
M926CE	384 x 184mm	Twin lens manually adjustable mirror
M926CEH	384 x 184mm	Heated twin lens manually adjustable mirror
M926CE-Yellow	384 x 184mm	Twin lens manually adjustable mirror with yellow body
M926CEH-Yellow	384 x 184mm	Heated twin lens manually adjustable mirror with yellow body
MX926CE	384 x 184mm	Twin lens manually adjustable mirror with unbreakable lenses
MX926CEH	384 x 184mm	Heated twin lens manually adjustable mirror with unbreakable lenses
MX926CE-Yellow	384 x 184mm	Twin lens manually adjustable mirror with yellow body and unbreakable lenses
MX926CEH-Yellow	384 x 184mm	Heated twin lens manually adjustable with yellow body and unbreakable lenses
		<i>Powered versions</i>
M925CEH	384 x 184mm	Twin lens power adjustable and heated mirror
M925CEH-Yellow	384 x 184mm	Twin lens power adjustable and heated mirror with yellow body
MX925CEH	384 x 184mm	Twin lens power adjustable and heated mirror with unbreakable lenses
MX925CEH-Yellow	384 x 184mm	Twin lens power adjustable and heated mirror with yellow body and unbreakable lenses
