

INTERIOR MIRRORS

Interior mirrors can be used to help drivers and operators gain enhanced visibility where danger may be present. The Ashtree range covers many applications. There are wide angle mirror like the MX943, see images above. On materials handling and construction equipment these are widely used as they give the operator almost 180 degrees of vision. Buses and other vehicles tend to favour smaller radii of curvature as they don't have the same visibility requirements. Ashtree also have observation mirrors that can be mounted onto handrails on buses so that drivers can observe the inside of the vehicle, especially useful if the bus has a second set of doors. Part number S1173 on pages 26 and 27 can be used to mount almost any mirror onto a handrail.

This mirror arm can be used for mounting mirrors onto a horizontal or vertical surface. Adjust the arm to the correct angle and then tighten the bolt in the bracket to create a stable mounting point for your mirror.
